

## IT Consultant

(m/f/d) | Munich, Germany | Hybrid Work

Join a smart, international team that works every day hand-in-hand to make their vision of "No more boring tasks!" come true. Enter a results-driven work culture that offers innovative IT projects in various industries and take on a role that allows you to carry real responsibility from day one.

We are much. Consulting, a fast-growing, international consultancy with a focus on business IT & ERP systems. If you seek professionalism, but without the usual rigid structures, we invite you to become part of our team!

### Our offer

- **Quick career advancement:** you can quickly advance to Senior Consultant, with the possibility to specialize in one of our various business areas
- **Challenging tasks & real impact:** you carry responsibility from day one, shape company processes, contribute your own ideas and lead us to success
- **Innovative, result-driven work culture:** look forward to short, flexible decision-making paths and lean processes
- **A motivated, high-performing team:** work with like-minded professionals with great expertise and passion for what they do
- **Flexible working hours:** work-life-balance is important, period - structure your reasonable working hours in a way that suits your life best
- **Plenty additional benefits:** annual bonus, fitness center, self-learning budget, state-of-the-art equipment - our employees are our biggest assets & we do our best to show it

### Your profile

- At least 2 years of experience as an IT consultant or ERP user
- Experience in customer handling
- Good understanding and knowledge of IT in general
- Very fast comprehension skills, analytical way of working and thinking as well as high commitment
- Passion for solving challenging problems
- English & German speaking team player

### Your tasks

- Conduct IT projects & manage projects independently
- Design IT processes for different business units
- Steer the development of IT solutions
- Conduct workshops & pitches for our customers
- Design business IT architectures
- Develop towards a management position or an expert role in one of various fields
